

THE BEST ONLINE DEALERSHIP INVENTORY, LEAD AND MARKETING SOLUTION

PRODUCT DESCRIPTION

Solrise Auto-Sales Management System™ (SAMST™) is an integrated suite of automotive sales management tools that can increase dealership revenue while lowering transactions costs.

SAMST™ is designed to help dealerships manage their website inventories, classified listings, online auctions, financial and inventory leads with quick secured access at minimal cost.

Solrise has designed a simple to use web-based technology (SAMST™) that offers a user friendly interface while enabling sophisticated transactions from web based clients. This technology also allows management to train its employees quickly and efficiently with a minimal learning curve. This suite facilitates integration with some of the most well known automotive vendors (Carfax, Ebay-Motors, AutoTrader, and etc.)

Every Solrise client has a dedicated Account Manager that learns about your business and works with you over time to achieve your goals. Solrise puts you in control and increases your client base by providing excellent product presentations and professional services.

SAMST™ is designed and crafted to automate office administration and financial functions while providing real-time exchange of information. Solrise automates dozens of time-consuming processes and frees up your time to interact with expanding leads and to sell more cars.

Some of SAMST™ features include:

- ***Inventory Manager***
 - SAMST™ helps you maintain a visual inventory of the vehicles you sell. Your exclusive inventory can be viewed from virtually anywhere. This allows for constant and easy inventory management
 - With SAMST™, you'll have an advanced gallery system with unlimited photos/listing for each vehicle. As they say, a picture is worth a thousand words. Use your photos to fully highlight your vehicles to your clients.
 - SAMST™ photo manager makes it quite simple to add, delete, and rearrange photos. Customize your website to your company's advantage.
 - SAMST™ portal has fields that enable your dealership to fully detail each vehicle's physical characteristics, overall condition and prior owner service history. Your buyers will know exactly what they are purchasing.
 - SAMST™ allows for multiple licensed uses for multiple sales contacts and locations. The system synchronizes itself or multiple remote platforms to allow for easy inventory tracking.

THE BEST ONLINE DEALERSHIP INVENTORY, LEAD AND MARKETING SOLUTION

- ***Interface and design***

- SAMS™ allows users to manage their web content with no computer programming experience. Users enter information into the SAMS™ and the changes are automatically reflected on your website. Your dealership can also easily customize settings to separate you from your competition.
- SAMS™ makes it quite easy to upload and present photos of your inventory on the web. You can take pictures of your vehicles and load them into the SAMS™ quickly and effortlessly.

- ***E-mail & web statistics***

- Solrise Solutions, Inc. provides domain name and website hosting services so that your entire online strategy is supported from a single point.
- SAMS™ provides e-mail forwarding allowing you to capture and quickly respond to web inquiries. Your dealership will be more successful in pursuing a proactive relationship with possible clients. Most importantly, you will always know what your clients' needs are.
- SAMS™ creates charts and reports allowing you to analyze web statistics helping you better understand your clients. This allows you to learn and adjust to your specific market, based on your SAMS™ reports.
- Reports from SAMS™ assist you with lead inquiries, financing and inventory. These reports are clear, concise, and accurately detail transactions, making it easier to manage your business, not your software.
